DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-2, and 4-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Despres et al. (US 6,434,379)

Despres et al. disclose a system and method for loading value over a telecommunication network onto a smart card, said smart card loading system comprising:

- a mobile telephone handset in communication with said telecommunication network, said handset including a subscriber identification module, a card reader for communicating with a smart card, which is separate from the subscriber identification module of the mobile telephone handset, arranged to be inserted in said handset, and an input interface for indicating a value to be loaded onto said smart card, said smart card being arranged to generate a request message to load said value onto said smart card (figs. 2-3; col.1, line 25-col.5, line 47);
- a gateway computer (12) arranged to receive said request message from said handset over said telecommunications network and to retransmit said request message (col.2, line 60-col.4, line 25);

Art Unit: 3628

- a funds issuer computer arranged to receive said request message and to debit a consumer account associated with said smart card (col.3, line55-col.4, line 26); and
- an authentication computer arranged to receive said request message and to authenticate said smart card, whereby said smart card may be authorized to load said value (claim 16).
